2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

★ Canada's quota in the I.M.F. was set at U.S. \$300 million in Feb. 1947, raised to U.S. \$550 million in Oct. 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars.

1. Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966, gold sales to Canada by the I.M.F. of U.S. \$9 million in Dec. 1964, U.S. \$27.5 million in May 1965, U.S. \$2.5 million in June 1969, and an I.M.F. dividend payment to Canada of U.S. \$2.8 million in October 1968; and the following transactions under the General Arrangements to Borrow — borrowings from Canada by the I.M.F. of U.S. \$15 million in December 1964, U.S. \$35 million in May 1965 and U.S. \$40 million in June 1969 and repayments to Canada by the I.M.F. of U.S. \$15 million in May 1967 and U.S. \$35 million in February 1968.

2. Equals the excess of I.M.F. holdings of Canadian dollars over the sum of outstanding loans under the G.A.B. and 75% of the Canadian quota. This amount in foreign exchange must be repaid against Canadian dollars as required by the Fund's procedures.

3. Equals the excess of the Canadian quota plus outstanding loans under the G.A.B. over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need. Additional drawings would require further justification.

4. Equals excess of outstanding loans under the G.A.B. plus 75% of the Canadian quota over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need without incurring an obligation to repay. † Corrected.

★ La quote-part du Canada au F.M.I. fut fixée à \$É.-U. 300 millions en février 1947 et portée à \$É.-U. 550 millions en octobre 1959, puis à \$É.-U. 740 millions en mai 1966; 25% ont été souscrits en or et 75% en dollars canadiens.

1. Comprend le versement d'une souscription en dollars canadiens équivalant à \$É.-U. 142.5 millions en mai 1966; les ventes d'or du F.M.I. au Canada, soit: \$É.-U. 9 millions en décembre 1964, \$É.-U. 27.5 millions en mai 1965, \$É.-U. 2.5 millions en juin 1969, et un dividende du F.M.I., soit \$É.-U. 2.8 millions, payé au Canada en octobre 1968; et les opérations suivantes en vertu des Accords Généraux d'Emprunt: prêts du Canada au F.M.I.: \$É.-U. 15 millions en décembre 1964, \$É.-U. 35 millions en mai 1965 et \$É.-U. 40 millions en juin 1969, remboursement au Canada par le F.M.I. d'une somme de \$É.-U. 15 millions en mai 1967 et \$É.-U. 35 millions en février 1968.

2. Équivalent à l'avoir en dollars canadiens, après déduction de 75% de la quote-part du Canada et des prêts au Fonds en vertu des Accords Généraux d'Emprunt. Ce montant doit être remboursé en devises contre des dollars canadiens, suivant les règles établies par le Fonds.

3. Équivalent à la quote-part du Canada, plus les prêts en vertu des Accords Généraux d'Emprunt, moins l'avoir du F.M.I. en dollars canadiens. Ce montant peut faire l'objet de tirages en devises contre des dollars canadiens, en principe sur simple déclaration que le Canada en a besoin pour sa balance des paiements. Tous autres tirages doivent être motivés de façon plus explicite.

4. Équivalent à 75% de la quote-part du Canada, plus les prêts au F.M.I. en vertu des Accords Généraux d'Emprunt, moins l'avoir du Fonds en dollars canadiens. Ce montant peut faire l'objet de tirages en devises contre des dollars canadiens, en principe sur simple déclaration que le Canada en a besoin pour sa balance des paiements, sans l'obligation d'en effectuer le remboursement. † Chiffres corrigés.

1. New gold production measured when it is either (a) sold to the Minister of Finance Exchange Fund account, (b) sold in commercial market or (c) exported directly from mines in Canada in crude form or concentrates. To the extent that there are changes in mine inventories, gold in transit from the mines or in process of refining, this figure differs from reported mine production: on the other hand it corresponds more closely to the timing of receipts arising from sales of newly mined gold.

2. Excluding the gold content of exports of jewellers' sweepings and precious metal scraps which are shown in the export returns.

3. Excluding small amounts of unmanufactured gold, scrap and manufactured forms which are shown under various headings in the import returns.

4. Holdings of the Exchange Fund.

1. Évaluée au moment où l'or est a) cédé au ministre des Finances pour le compte du Fonds des changes, b) livré au marché ou c) exporté directement des mines canadiennes sous forme de minerai ou de concentré. Par suite des variations des stocks d'or aux mines, en route ou aux raffineries, ces chiffres ne concordent pas toujours avec ceux de la production minière retenus par la statistique générale, mais tiennent davantage compte des dates où les mines ont effectivement touché le produit de leurs ventes d'or neuf.

2. Non compris l'or neuf contenu dans les exportations de déchets de joaillerie et autres rebuts de métaux précieux, recensés ailleurs dans la statistique des exportations.

3. A l'exclusion de petites quantités d'or ouvré ou non ouvré et de déchets, recensés ailleurs dans la statistique des importations.

4. Avoirs du Fonds de change.

★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars — Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities — Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

1. Capital, rest fund and undivided profits as at the latest fiscal year-end.
2. Amortized value. See also footnote 1 on page 670.

3. Includes Canadian issues payable in foreign currency. Accrued interest also included.
4. Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
5. Research Department estimates.
6. Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.
7. Loans to finance the purchase of Canada Savings Bonds at time of issue.
8. Includes securities guaranteed by provincial governments.
9. Includes bank premises, share of and loans to controlled corporations coin in Canada, Canadian dollars deposits with other banks and other assets.

* Par suite d'une modification apportée à l'Annexe M de la Loi sur les banques, les "réserves pour pertes" figurent maintenant à une rubrique spéciale au passif des banques au lieu d'être déduites des prêts et autres actifs correspondants comme auparavant. Ce changement a affecté certains postes de l'actif, à compter du 31 octobre 1967 dans le cas des séries statistiques mensuelles et du 29 novembre 1967, dans le cas des séries hebdomadaires. Afin de fournir des données strictement comparables, les chiffres des rubriques suivantes à l'actif ont été révisés à partir du 24 novembre 1965: Avoir net en monnaies étrangères; Prêts sur titres, à vue ou à court terme; Prêts en dollars canadiens aux municipalités, aux négociants en céréales, aux sociétés de financement des ventes à tempérament, Prêts généraux, Autres prêts hypothécaires à la construction domiciliaire; Autres titres canadiens de municipalités et de sociétés; Autres éléments d'actif; Ensemble des avoirs canadiens et des avoirs nets en monnaies étrangères. Une nouvelle rubrique "Réserves pour pertes" figure maintenant au passif.

- Capital social, fonds de prévoyance et bénéfices non répartis à la fin du dernier exercice.
- A leur valeur amortie. Voir aussi le renvoi 1 de la page 671.

- Y compris les titres canadiens payables en monnaies étrangères. Y compris également l'intérêt couru.
- Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères — moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.
- Estimations du Service des recherches.
- Les titres achetés directement de l'émetteur et dont l'échéance, lors de l'émission, est à moins d'un an figurent aux bilans bancaires, comme prêts.
- Prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission.
- Y compris les titres garantis par les gouvernements provinciaux.
- Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis qui ont précédé immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

★ See footnote ★ on page 668 regarding major revisions to these series arising from an amendment to Schedule M of the Bank Act.

1. This table covers total foreign currency assets and liabilities, whether booked in Canada or abroad. For additional detail see next two pages and page 793 in the December 1965 "Statistical Summary".

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 669.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créancier.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 667.
- Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years.
- Since July 6, 1966 the average of posted rates for 90-day finance company paper has

been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.
- Non-chequeable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.
- As at month-end.
- Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.
- The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

1. La date d'entrée en vigueur est indiquée entre parenthèses.
2. Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
3. Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 667.
4. Dette publique payable en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
5. Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans.
6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier

entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.

7. Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.
8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.
9. A la fin du mois.
10. Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.
11. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

1. Includes small amount of investments (less than \$1.1 million at August 31, 1969).

2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 31 août 1969).

2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles. † Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. A partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion. † Chiffres rectifiés.

1. The estimates are based on a sample of about 35,000 households and are therefore subject to sampling error which is relatively larger the smaller the estimates.

2. Source: Department of National Defence.

3. The population of the Yukon and N. W. Territories is not surveyed.

4. Prior to January, 1964, components do not add exactly to total employment because the breakdown of female employment between married and other is not available on the latest census bench mark basis.

5. Includes single, widowed and divorced persons.

1. Estimations à partir d'un échantillonnage couvrant environ 35,000 foyers, donc sujettes à une marge d'erreur dont l'importance, pour chaque catégorie, est d'autant plus appréciable que les effectifs sont moindres.

2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

5. Célibataires, veuves ou divorcées.

- Equals the excess of the Canadian quota plus outstanding loans under the G.A.B. over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need. Additional drawings would require further justification.

★ Based on Import Commodity Classification introduced by D.B.S. in January 1964. A complete list of the commodity classification numbers included in each category is available on request from the Research Department, Bank of Canada.

■ Arbitrary adjustments have been made to the import commodity detail for the period from the second quarter 1966 to the third quarter 1967 to allow for revisions to the import figures caused by a lag in the receipt by D.B.S. of import documents from an important Canadian port.

1. Comprises conveying, elevating, material handling, construction, excavating, mining, petroleum and natural gas industries equipment.

2. Comprises mainly wood, paper, metalworking, printing, book binding, textiles, leather, food and tobacco industries equipment.

3. Comprises mainly industrial furnaces and linings, other general purpose industrial machinery, communications industry equipment, precision instruments, scientific and medical equipment, hand tools, office equipment and furniture.

4. Includes non-alcoholic beverages.

5. Mainly shipments valued at less than \$200 each and Canadian exports returned.

† Revised.

★ D'après la nomenclature des produits importés adoptée par le B.F.S. en janvier 1964. On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, à Ottawa, la liste complète des numéros de tous les produits groupés dans chaque catégorie.

■ Par suite de certains retards survenus dans la réception des documents d'importation transmis au B.F.S. par un important port canadien entre avril 1966 et septembre 1967, le montant des importations pour les six trimestres en question a été révisé et les différences ont été réparties arbitrairement entre les diverses catégories de produits importés.

1. Comprend les convoyeurs et le matériel pour levage, manutention, construction, excavation, mines et industries du pétrole et du gaz naturel.

2. Comprend principalement le matériel des secteurs suivants: bois, papier, métallurgie, imprimerie, reliure, textiles, cuir, aliments et tabacs.

3. Comprend principalement: fours industriels et garnitures, autres machines industrielles d'utilité générale, matériels de télécommunication, instruments de précision, matériel scientifique et médical, outils portatifs, matériels et mobiliers de bureau.

4. Y compris les boissons non alcooliques.

5. Principalement les expéditions d'une valeur de moins de \$200 et les exportations canadiennes renvoyées à l'étranger.

★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars — Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities — Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

1. Capital, rest fund and undivided profits as at the latest fiscal year-end.
2. Amortized value. See also footnote 1 on page 751.

3. Includes Canadian issues payable in foreign currency. Accrued interest also included.
4. Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
5. Research Department estimates.
6. Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.

* Par suite d'une modification apportée à l'Annexe M de la Loi sur les banques, les "réserves pour pertes" figurent maintenant à une rubrique spéciale au passif des banques au lieu d'être déduites des prêts et autres actifs correspondants comme auparavant. Ce changement a affecté certains postes de l'actif, à compter du 31 octobre 1967 dans le cas des séries statistiques mensuelles et du 29 novembre 1967, dans le cas des séries hebdomadaires. Afin de fournir des données strictement comparables, les chiffres des rubriques suivantes à l'actif ont été révisés à partir du 24 novembre 1965: Avoir net en monnaies étrangères; Prêts sur titres, à vue ou à court terme; Prêts en dollars canadiens aux municipalités, aux négociants en céréales, aux sociétés de financement des ventes à tempérament, Prêts généraux, Autres prêts hypothécaires à la construction domiciliaire; Autres titres canadiens de municipalités et de sociétés; Autres éléments d'actif; Ensemble des avoirs canadiens et des avoirs nets en monnaies étrangères. Une nouvelle rubrique "Réserves pour pertes" figure maintenant au passif.

- Capital social, fonds de prévoyance et bénéfices non répartis à la fin du dernier exercice.
- A leur valeur amortie. Voir aussi le renvoi 1 de la page 752.

- Y compris les titres canadiens payables en monnaies étrangères. Y compris également l'intérêt couru.
- Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères - moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.
- Estimations du Service des recherches.
- Les titres achetés directement de l'émetteur et dont l'échéance, lors de l'émission, est à moins d'un an figurent aux bilans bancaires, comme prêts.
- Prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission.
- Y compris les titres garantis par les gouvernements provinciaux.
- Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis qui ont précédé immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

1. This table covers total foreign currency assets and liabilities, whether booked in Canada or abroad. For additional detail see next two pages and page 793 in the December 1965 "Statistical Summary".

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 750.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créditeur.

* Les cours sont la moyenne des cours acheteur et vendeur à la clôture. Les rendements sont exprimés en % par année, la date retenue pour le calcul étant l'échéance, lorsque le cours est au-dessous du pair, et la première date où un remboursement par anticipation

pourrait être effectué, lorsque le cours est au-dessus du pair.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

1. The effective dates are shown in brackets.

2. In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.

3. Following the Wednesday date shown. Weekly data are given on page 748.

4. Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.

5. The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

6. Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

7. Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

8. Non-chequeable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.

9. As at month-end.

10. Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

11. The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

1. La date d'entrée en vigueur est indiquée entre parenthèses.
2. Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
3. Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 748.
4. Dette publique payable en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
5. Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
7. Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.
8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.
9. A la fin du mois.
10. Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.
11. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

1. Includes small amount of investments (less than \$1.1 million at August 31, 1969).
2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 31 août 1969).
2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles. † Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion. † Chiffres rectifiés.

★NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been restructured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

★NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

1. The estimates are based on a sample of about 35,000 households and are therefore subject to sampling error which is relatively larger the smaller the estimates.

2. Source: Department of National Defence.

3. The population of the Yukon and N. W. Territories is not surveyed.

4. Prior to January, 1964, components do not add exactly to total employment because the breakdown of female employment between married and other is not available on the latest census bench mark basis.

1. Estimations à partir d'un échantillonnage couvrant environ 35,000 foyers, donc sujettes à une marge d'erreur dont l'importance, pour chaque catégorie, est d'autant plus appréciable que les effectifs sont moindres.

2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

5. Célibataires, veuves ou divorcées.

★ Canada's quota in the I.M.F. was set at U.S. \$300 million in Feb. 1947, raised to U.S. \$550 million in Oct. 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars.

1. Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966, gold sales to Canada by the I.M.F. of U.S. \$9 million in Dec. 1964, U.S. \$27.5 million in May 1965, U.S. \$2.5 million in June 1969, U.S. \$6.1 million in Sept., 1969, and an I.M.F. dividend payment to Canada of U.S. \$2.8 million in October 1968; and the following transactions under the General Arrangements to Borrow — borrowings from Canada by the I.M.F. of U.S. \$15 million in December 1964, U.S. \$35 million in May 1965, U.S. \$40 million in June 1969, and U.S. \$25.5 million in Sept., 1969, and repayments to Canada by the I.M.F. of U.S. \$15 million in May 1967 and U.S. \$35 million in February 1968.

2. Equals the excess of I.M.F. holdings of Canadian dollars over the sum of outstanding loans under the G.A.B. and 75% of the Canadian quota. This amount in foreign exchange must be repaid against Canadian dollars as required by the Fund's procedures.

3. Equals the excess of the Canadian quota plus outstanding loans under the G.A.B. over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need. Additional drawings would require further justification.

4. Equals excess of outstanding loans under the G.A.B. plus 75% of the Canadian quota over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need without incurring an obligation to repay.

Comprend le versement d'une souscription en dollars canadiens équivalant à \$É.-U. 142.5 millions en mai 1966; les ventes d'or du F.M.I. au Canada, soit: \$É.-U. 9 millions en décembre 1964, \$É.-U. 27.5 millions en mai 1965, \$É.-U. 2.5 millions en juin 1969, \$É.-U. 6.1 millions en septembre 1969, et un dividende du F.M.I., soit \$É.-U. 2.8 millions, payé au Canada en octobre 1968; et les opérations suivantes en vertu des Accords Généraux d'Emprunt: prêts du Canada au F.M.I.: \$É.-U. 15 millions en décembre 1964 \$É.-U. 35 millions en mai 1965, \$É.-U. 40 millions en juin 1969 et \$É.-U. 25.5 million en septembre 1969, remboursement au Canada par le F.M.I. d'une somme de \$É.-U. 15 millions en mai 1967 et \$É.-U. 35 millions en février 1968.

2. Équivalent à l'avoir en dollars canadiens, après déduction de 75% de la quote-part du Canada et des prêts au Fonds en vertu des Accords Généraux d'Emprunt. Ce montant doit être remboursé en devises contre des dollars canadiens, suivant les règles établies par le Fonds.

3. Équivalent à la quote-part du Canada, plus les prêts en vertu des Accords Généraux d'Emprunt, moins l'avoir du F.M.I. en dollars canadiens. Ce montant peut faire l'objet de tirages en devises contre des dollars canadiens, en principe sur simple déclaration que le Canada en a besoin pour sa balance des paiements. Tous autres tirages doivent être motivés de façon plus explicite.

4. Équivalent à 75% de la quote-part du Canada, plus les prêts au F.M.I. en vertu des Accords Généraux d'Emprunt, moins l'avoir du Fonds en dollars canadiens. Ce montant peut faire l'objet de tirages en devises contre des dollars canadiens, en principe sur simple déclaration que le Canada en a besoin pour sa balance des paiements, sans l'obligation d'en effectuer le remboursement.

★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars — Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities — Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

1. Capital, rest fund and undivided profits as at the latest fiscal year-end.
2. Amortized value. See also footnote 1 on page 838.

3. Includes Canadian issues payable in foreign currency. Accrued interest also included.
4. Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
5. Research Department estimates.
6. Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.
7. Loans to finance the purchase of Canada Savings Bonds at time of issue.
8. Includes securities guaranteed by provincial governments.
9. Includes bank premises, share of and loans to controlled corporations coin in Canada, Canadian dollars deposits with other banks and other assets.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis qui ont précédé immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

★ See footnote ★ on page 836 regarding major revisions to these series arising from an amendment to Schedule M of the Bank Act.

1. This table covers total foreign currency assets and liabilities, whether booked in Canada or abroad. For additional detail see next two pages and page 793 in the December 1965 "Statistical Summary".

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 837.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créancier.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 748.
- Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

- Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.
- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.
- Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.
- As at month-end.
- Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.
- The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

1. La date d'entrée en vigueur est indiquée entre parenthèses.
2. Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
3. L'endemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 748.
4. Dette publique payable en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
5. Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.

7. Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.

9. A la fin du mois.

10. Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.

11. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

1. Includes small amount of investments (less than \$1.1 million at Sept. 30, 1969).

2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 30 sept. 1969).

2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles. † Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. A partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion. † Chiffres rectifiés.

★NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been restructured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

★NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

1. The estimates are based on a sample of about 35,000 households and are therefore subject to sampling error which is relatively larger the smaller the estimates.

2. Source: Department of National Defence.

3. The population of the Yukon and N. W. Territories is not surveyed.

4. Prior to January, 1964, components do not add exactly to total employment because the breakdown of female employment between married and other is not available on the latest census benchmark basis.

5. Includes single, widowed and divorced persons.

1. Estimations à partir d'un échantillonnage couvrant environ 35,000 foyers, donc sujettes à une marge d'erreur dont l'importance, pour chaque catégorie, est d'autant plus appréciable que les effectifs sont moindres.

2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

5. Célibataires, veuves ou divorcées.

★ Canada's quota in the I.M.F. was set at U.S. \$300 million in Feb. 1947, raised to U.S. \$550 million in Oct. 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars.

- Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966, gold sales to Canada by the I.M.F. of U.S. \$9 million in Dec. 1964, U.S. \$27.5 million in May 1965, U.S. \$2.5 million in June 1969, U.S. \$6.1 million in Sept. 1969, and an I.M.F. dividend payment to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969; and the following transactions under the General Arrangements to Borrow — borrowings from Canada by the I.M.F. of U.S. \$15 million in December 1964, U.S. \$35 million in May 1965, U.S. \$40 million in June 1969, and U.S. \$25.5 million in Sept. 1969, and repayments to Canada by the I.M.F. of U.S. \$15 million in May 1967 and U.S. \$35 million in February 1968.
- Equals the excess of I.M.F. holdings of Canadian dollars over the sum of outstanding loans under the G.A.B. and 75% of the Canadian quota. This amount in foreign exchange must be repaid against Canadian dollars as required by the Fund's procedures.
- Equals the excess of the Canadian quota plus outstanding loans under the G.A.B. over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need. Additional drawings would require further justification.
- Equals excess of outstanding loans under the G.A.B. plus 75% of the Canadian quota over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need without incurring an obligation to repay.

1. New gold production measured when it is either (a) sold to the Minister of Finance Exchange Fund account, (b) sold in commercial market or (c) exported directly from mines in Canada in crude form or concentrates. To the extent that there are changes in mine inventories, gold in transit from the mines or in process of refining, this figure differs from reported mine production: on the other hand it corresponds more closely to the timing of receipts arising from sales of newly mined gold.
 2. Excluding the gold content of exports of jewellers' sweepings and precious metal scraps which are shown in the export returns.
 3. Excluding small amounts of unmanufactured gold, scrap and manufactured forms which are shown under various headings in the import returns.
 4. Holdings of the Exchange Fund.

1. Évaluée au moment où l'or est a) cédé au ministre des Finances pour le compte du Fonds des changes, b) livré au marché ou c) exporté directement des mines canadiennes sous forme de minerai ou de concentré. Par suite des variations des stocks d'or aux mines, en route ou aux affineries, ces chiffres ne concordent pas toujours avec ceux de la production minière retenus par la statistique générale, mais tiennent davantage compte des dates où les mines ont effectivement touché le produit de leurs ventes d'or neuf.
2. Non compris l'or neuf contenu dans les exportations de déchets de joaillerie et autres rebuts de métaux précieux, recensés ailleurs dans la statistique des exportations.
3. A l'exclusion de petites quantités d'or ouvré ou non ouvré et de déchets, recensés ailleurs dans la statistique des importations.
4. Avoirs du Fonds de change. ‡ Chiffres corrigés. † Chiffres rectifiés.

★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars — Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities — Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

1. Capital, rest fund and undivided profits as at the latest fiscal year-end.
2. Amortized value. See also footnote 1 on page 918.

3. Includes Canadian issues payable in foreign currency. Accrued interest also included.
4. Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
5. Research Department estimates.
6. Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.
7. Loans to finance the purchase of Canada Savings Bonds at time of issue.
8. Includes securities guaranteed by provincial governments.
9. Includes bank premises, share of and loans to controlled corporations coin in Canada, Canadian dollars deposits with other banks and other assets.

★ Par suite d'une modification apportée à l'Annexe M de la Loi sur les banques, les "réserves pour pertes" figurent maintenant à une rubrique spéciale au passif des banques au lieu d'être déduites des prêts et autres actifs correspondants comme auparavant. Ce changement a affecté certains postes de l'actif, à compter du 31 octobre 1967 dans le cas des séries statistiques mensuelles et du 29 novembre 1967, dans le cas des séries hebdomadaires. Afin de fournir des données strictement comparables, les chiffres des rubriques suivantes à l'actif ont été révisés à partir du 24 novembre 1965: Avoir net en monnaies étrangères; Prêts sur titres, à vue ou à court terme; Prêts en dollars canadiens aux municipalités, aux négociants en céréales, aux sociétés de financement des ventes à tempérament, Prêts généraux, Autres prêts hypothécaires à la construction domiciliaire; Autres titres canadiens de municipalités et de sociétés; Autres éléments d'actif; Ensemble des avoirs canadiens et des avoirs nets en monnaies étrangères. Une nouvelle rubrique "Réserves pour pertes" figure maintenant au passif.

1. Capital social, fonds de prévoyance et bénéfices non répartis à la fin du dernier exercice.
2. A leur valeur amortie. Voir aussi le renvoi 1 de la page 919.

3. Y compris les titres canadiens payables en monnaies étrangères. Y compris également l'intérêt couru.

4. Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères - moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.

5. Estimations du Service des recherches.

6. Les titres achetés directement de l'émetteur et dont l'échéance, lors de l'émission, est à moins d'un an figurent aux bilans bancaires, comme prêts.

7. Prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission.

8. Y compris les titres garantis par les gouvernements provinciaux.

9. Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis qui ont précédé immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1er au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

★ See footnote ★ on page 916 regarding major revisions to these series arising from an amendment to Schedule M of the Bank Act.

1. This table covers total foreign currency assets and liabilities, whether booked in Canada or abroad. For additional detail see next two pages and page 793 in the December 1965 "Statistical Summary".

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 917.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créancier.

1. All series have been adjusted by means of a ratio to moving average technique and are subject to revision.
2. Less Canadian dollar cheques and other items in transit.
3. Excludes Government of Canada deposits.
4. Excludes day-to-day loans, call loans and loans for the purchase of Canada Savings Bonds at time of issue.

NOTE: The seasonally-adjusted, average of Wednesdays figures for November which are marked with an asterisk have been adjusted with a view to eliminating the unusual distortions which resulted this year from timing differences between the redemption of outstanding issues of Canada Savings Bonds and the receipt of the proceeds of sales of the new series during the first week of November. Net redemptions of Canada Savings Bonds in the week ending November 5, 1969 were approximately \$500 million higher than in the week ending November 6, 1968. To eliminate the effect of these net redemptions on the general public's holdings of bank deposits, the unadjusted weekly figures for November 5th for demand deposits and personal savings deposits were reduced by \$450 million and \$50 million respectively. Without this special adjustment the general public's holdings of currency and bank deposits in seasonally-adjusted terms for November would have been \$27,710 million while demand deposits and personal savings deposits would have been \$5,822 million and \$15,012 million respectively.

1. Toutes ces séries ont été ajustées d'après une méthode basée sur l'évolution de moyennes mobiles et sont sujettes à révision.
2. Moins les chèques ou autres effets en cours de compensation.
3. A l'exclusion des dépôts du gouvernement canadien.
4. A l'exclusion des prêts au jour le jour, des prêts à vue sur titres et des prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission.

NOTE: Les statistiques du mois de novembre 1969 marquées d'un astérisque (Moyennes des mercredis — désaisonnalisées) ont été ajustées en vue d'éliminer les distortions extraordinaires causées cette année par le décalage entre le remboursement d'émissions précédentes d'Obligations d'Épargne du Canada et la réception du produit des ventes de la nouvelle émission au cours de la 1^{ère} semaine de novembre. Les remboursements nets d'Obligations d'Épargne du Canada au cours de la semaine terminée le 5 novembre ont été d'environ \$500 millions supérieurs à ceux de la semaine correspondante de l'année dernière. Pour compenser l'effet de ces remboursements nets sur les dépôts du public dans les banques, les chiffres non désaisonnalisés des dépôts au 5 novembre ont été réduits des montants suivants: Dépôts à vue, \$450 millions; dépôts d'épargne personnel, \$50 millions.

Sans cet ajustement, les chiffres désaisonnalisés pour novembre auraient été les suivants:

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

1. The effective dates are shown in brackets.

2. In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.

3. Following the Wednesday date shown. Weekly data are given on page 915.

4. Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.

5. The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

6. Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

7. Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

8. Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.

9. As at month-end.

10. Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

11. The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

1. La date d'entrée en vigueur est indiquée entre parenthèses.

2. Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.

3. Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 915.

4. Dette publique payable en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.

5. Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.

7. Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.

9. A la fin du mois.

10. Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.

11. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

Sur les \$55 millions en actions privilégiées, \$53 millions ont été échangés contre des obligations garanties par la province de Québec.

16. Y compris les sommes distribuées par la B.C. Power Corporation à ses actionnaires — sur les fonds reçus de la province de la Colombie-Britannique — en paiement d'actions de la B.C. Electric, soit \$115 millions au 1^{er} trimestre de 1964 et \$2 millions au 1^{er} trimestre de 1965.

SOURCE: Industrial Development Bank.

- Includes small amount of investments (less than \$1.1 million at Nov. 30, 1969).
- The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

† Revised.

SOURCE: Banque d'Expansion Industrielle.

- Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 30 nov. 1969).
- Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles.

★ 1968-69 data revised.

SOURCE: Bureau fédéral de la Statistique.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. A partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion.

★NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been re-structured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

★NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

1. The estimates are based on a sample of about 35,000 households and are therefore subject to sampling error which is relatively larger the smaller the estimates.

2. Source: Department of National Defence.

3. The population of the Yukon and N. W. Territories is not surveyed.

4. Prior to January, 1964, components do not add exactly to total employment because the breakdown of female employment between married and other is not available on the latest census benchmark basis.

5. Includes single, widowed and divorced persons.

1. Estimations à partir d'un échantillonnage couvrant environ 35,000 foyers, donc sujettes à une marge d'erreur dont l'importance, pour chaque catégorie, est d'autant plus appréciable que les effectifs sont moindres.

2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

5. Célibataires, veuves ou divorcées.

* Canada's quota in the I.M.F. was set at U.S. \$300 million in Feb. 1947, raised to U.S. \$550 million in Oct. 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars.

1. Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966, gold sales to Canada by the I.M.F. of U.S. \$9 million in Dec. 1964, U.S. \$27.5 million in May 1965, U.S. \$2.5 million in June 1969, U.S. \$6.1 million in Sept. 1969, and an I.M.F. dividend payment to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969; and the following transactions under the General Arrangements to Borrow — borrowings from Canada by the I.M.F. of U.S. \$15 million in December 1964, U.S. \$35 million in May 1965, U.S. \$40 million in June 1969, and U.S. \$25.5 million in Sept. 1969, and repayments to Canada by the I.M.F. of U.S. \$15 million in May 1967 and U.S. \$35 million in February 1968.

2. Equals the excess of I.M.F. holdings of Canadian dollars over the sum of outstanding loans under the G.A.B. and 75% of the Canadian quota. This amount in foreign exchange must be repaid against Canadian dollars as required by the Fund's procedures.

3. Equals the excess of the Canadian quota plus outstanding loans under the G.A.B. over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need. Additional drawings would require further justification.

4. Equals excess of outstanding loans under the G.A.B. plus 75% of the Canadian quota over I.M.F. holdings of Canadian dollars. This amount in foreign exchange may be drawn essentially automatically against Canadian dollars on statement of balance of payments need without incurring an obligation to repay.

* La quote-part du Canada au F.M.I. fut fixée à \$É.-U. 300 millions en février 1947 et portée à \$É.-U. 550 millions en octobre 1959, puis à \$É.-U. 740 millions en mai 1966; 25% ont été souscrits en or et 75% en dollars canadiens.

1. Comprend le versement d'une souscription en dollars canadiens équivalant à \$É.-U. 142.5 millions en mai 1966; les ventes d'or du F.M.I. au Canada, soit: \$É.-U. 9 millions en décembre 1964, \$É.-U. 27.5 millions en mai 1965, \$É.-U. 2.5 millions en juin 1969, \$É.-U. 6.1 millions en septembre 1969, et un dividende du F.M.I., soit \$É.-U. 2.8 millions, payé au Canada en octobre 1968 et \$É.-U. 0.2 million en octobre 1969; et les opérations suivantes en vertu des Accords Généraux d'Emprunt: prêts du Canada au F.M.I.: \$É.-U. 15 millions en décembre 1964, \$É.-U. 35 millions en mai 1965, \$É.-U. 40 millions en juin 1969 et \$É.-U. 25.5 millions en septembre 1969, remboursement au Canada par le F.M.I. d'une somme de \$É.-U. 15 millions en mai 1967 et \$É.-U. 35 millions en février 1968.

2. Équivalent à l'avoir en dollars canadiens, après déduction de 75% de la quote-part du Canada et des prêts au Fonds en vertu des Accords Généraux d'Emprunt. Ce montant doit être remboursé en devises contre des dollars canadiens, suivant les règles établies par le Fonds.

3. Équivalent à la quote-part du Canada, plus les prêts en vertu des Accords Généraux d'Emprunt, moins l'avoir du F.M.I. en dollars canadiens. Ce montant peut faire l'objet de tirages en devises contre des dollars canadiens, en principe sur simple déclaration que le Canada en a besoin pour sa balance des paiements. Tous autres tirages doivent être motivés de façon plus explicite.

4. Équivalent à 75% de la quote-part du Canada, plus les prêts au F.M.I. en vertu des Accords Généraux d'Emprunt, moins l'avoir du Fonds en dollars canadiens.
